CAREER OBJECTIVE

Skilled Full Stack Developer with over 3 years of hands-on experience in backend development using PHP frameworks like Laravel and CodeIgniter, and frontend technologies including JavaScript (React.js) and HTML/CSS. Proven track record in building and optimizing scalable web applications, enhancing database performance, and delivering user-friendly interfaces. Seeking a dynamic role where I can leverage my expertise in both backend and frontend development to create innovative solutions while continuing to grow in a fast-paced, tech-driven environment.

SKILLS

- Backend Development (PHP & Python)- Strong proficiency in backend development, designing APIs, optimizing server-side logic, and managing databases with PHP frameworks and Python , C# and Jav.
- Frontend Technologies Skilled in crafting responsive and user-friendly interfaces using HTML5, CSS3, JavaScript, React.js, and jQuery. Proficient in implementing media queries and ensuring cross-browser compatibility.
- Database Management- In-depth experience with relational databases like MySQL and PostgreSQL, optimizing queries, structuring databases, and managing data efficiently to ensure performance and scalability.
- API Development & Integration- Extensive experience in building RESTful APIs, integrating third-party APIs, and ensuring seamless communication between frontend and backend systems.

EXPERIENCE

Zestgeek Solutions Punjab India • Php Developer

(04/2022) – (03/2024)

Enhanced customer satisfaction by delivering 15+ custom PHP-based projects on time, leading to a 90% client retention rate.

Increased platform uptime by implementing automated monitoring and real-time error tracking, reducing downtime by 15% and ensuring smoother user experiences.

Deployed database optimizations that saved \$10,000 annually in server costs by reducing excessive query calls and optimizing the storage of high-volume data.

Progressive, Noida India • Php Developer

(04/2019) – (03/2022)

Led the development of a new e-commerce platform feature that increased online sales by 20% in the first quarter post-launch, improving overall client revenue.

Optimized database queries, reducing page load times by 35%, which resulted in a better user experience and improved search engine ranking.

Automated the testing process by implementing unit testing scripts, reducing manual testing time by 40%, leading to quicker deployment and fewer bugs.
